

velocity: -1.17 ± 0.08 cm/s

This plot shows the radial velocity of HD 10180 B from 2010 to 2023. The data points (blue dots) are tightly clustered around a constant value of -1.17 ± 0.08 cm/s, as indicated by the horizontal orange line and the text in the top right corner. The x-axis represents time in years, with major ticks at 2010, 2020, 2021, 2022, and 2023. The y-axis represents radial velocity in cm/s, with unlabeled tick marks.

velocity: -1.17 ± 0.08 cm/year
