

velocity: -1.20 ± 0.02 cm/s

This plot shows the radial velocity of HD 10180 B over time from 2010 to 2023. The data points, represented by blue circles, are tightly clustered around a constant value of -1.20 cm/s, as indicated by the orange horizontal line. The y-axis represents radial velocity in cm/s, and the x-axis represents time in years.

velocity: -1.20 ± 0.02 cm/year

Displacement [cm]
